- Waterproof: YES
- Installation Way: Glue
- Highlight: **Polished Channelume Aluminum Trim Cap, 13cm Wide Channelume Aluminum, 13cm Aluminum Trim Cap For Channel Letter**

Product Description

LED Channel Letter Signs Making with Channelume Aluminum 0.4mm-0.5mm Thickness

The Channelume Aluminum is available in four surface treatment options - anodized, powder coated, brushed, and polished. Each of these treatments offers unique benefits and can be chosen based on specific project requirements.

Anodized: This surface treatment provides a protective layer to the aluminum, making it more resistant to corrosion and wear. It also gives a modern, metallic look to the channel letters.

Powder Coated: This treatment involves applying a dry powder coating to the aluminum surface and then heating it to create a durable and long-lasting finish. It is available in a variety of colors and can be customized to match any design.

Brushed: The brushed surface treatment gives the aluminum a unique, textured finish, making it stand out from other channel letter materials. It is perfect for creating a more rustic or industrial look.

Polished: This surface treatment involves buffing the aluminum to a smooth and shiny finish, giving the channel letters a sleek and professional look. It is an excellent choice for high-end projects.

Features:

- Durable and long-lasting
- Waterproof and weather-resistant
- Lightweight and flexible
- High-quality raw material - aluminum
- Easy to cut and shape
- Available in different sizes and alloys
- Suitable for both indoor and outdoor use
