Features:

UPVC (Unplasticised Polyvinyl Chloride) has many outstanding properties that makes it attractive for use in the construction industry. It has a low weight which makes it easy to be shaped using a variety of tools, machines or even just handwork. It has excellent weatherability and can also be made to be very resistant to scratching and anti-static. The material is also environmentally friendly and non-toxic, meaning it is safe for both the public and environment. It can also be used with a variety of adhesives, enabling it to be attached and bonded to other materials with ease. Finally, its uniform and consistent color means that its oxide layer will never fall off.
